MEMORANDUM FOR THE RECORD

25X1A

SUBJECT: [REDACTED] Meeting

1. A meeting was held in the TID Conference Room at 0930 on 11 October 1967 to review the status of the [REDACTED] program currently being conducted by the [REDACTED]

2. [REDACTED] started the meeting by reviewing the purposes and objectives of [REDACTED]. He showed view graphs prepared for presentation to the CCB. He also discussed the first monthly report which consists of a summary of the first five weeks work reported by cable and some preliminary conclusions made from the data. A draft copy of the first monthly report was available for inspection and the finished report will be available when it is printed.

25X1D

3. The project was designed to collect luminance data pertaining to frequently covered targets as imaged on KH-4A, KH-4B [REDACTED] missions. It will be used to compare this data with more gross measurements of luminance made on a frame by frame basis, and to correlate this data with exposure criteria in an attempt to establish a data base for correctly exposing future mission photography. Microdensitometry is being used to obtain the target luminance data.

4. Discussion of the approach and progress to date followed [REDACTED] presentation. [REDACTED] suggested minor format additions for the monthly report which would provide more meaningful information. [REDACTED] also stated that after a rather slow start he was satisfied with the progress that [REDACTED] was now making. [REDACTED] suggested that the relationship between the effective microdensitometer aperture, projected through the scale factor to the ground, and the ground resolution of the photographic systems be checked. This should be done in order to establish that the measurements of luminance are not being contaminated by the area surrounding the target.

5. The meeting was concluded shortly after noon on the note that the progress to date would be reported at the CCB Meeting 18 October 1967 and work would continue at the rate of [REDACTED] targets reported per week.

25X1D

6. The first monthly report referred to above will be available for detail study and analysis by about 25 October 1967.
